OBJECTIVE

A **Frontend-Focused** Full-Stack Developer with solid experience in **React.js, Next.js, React Native, and Express.js**. Passionate about building scalable and user-friendly applications while continuously improving performance and maintainability. I aim to contribute my skills to impactful projects, collaborate with teams effectively, and stay updated with modern web technologies to deliver high-quality solutions.

GENERAL INFORMATION

Languages: Myanmar – native, English – business level, Japanese – basic level (N4)

Nationality: Myanmar

Resides: Bangkok, Thailand

EDUCATION

UTYCC - University of Technology (Yatanarpon Cyber City)

Dec 2013 – Feb 2020

Bachelor of Engineering

Major: **IST** (Information Science and Technology)

Cumulative GPA: **4.50** (out of 5)

Course Highlights:

- Data Structures & Algorithms
- Data Mining & Big Data Analysis
- Introduction to IoT
- Software Engineering
- Artificial Intelligence
- Business Strategy & IT
- Object-Oriented Design with UML
- Database Management System
- Distributed System & Cloud Computing
- Mobile development with java and android studio

EXPERIENCES

Company: **MARTER SOLUTION CO., LTD**

Sept 2018 – Oct 2019

Company Location: Myanmar

Position: **MERN Stack Developer (On-site)**

Team size: **5** people

Responsibilities:

- Played as an Internship Developer.
- Developed e-commerce(trading) web application by using frameworks and databases.

Technologies used: React.js, Express.js MySQL and MongoDB

Company: **ACEPLUS CO., LTD**

Jun 2020 – Feb 2022

Company Location: Myanmar

Position: **Junior Software Engineer (Hybrid)**

Team size: **5 to 10** people

Responsibilities:

- Played as a JavaScript full-stack Developer (Frontend heavy).
- Developed mobile applications and integrated with backend in-house API.
- Developed web applications and integrated with REST API.
- Maintained existing mobile applications and add new features
- Maintained existing web applications and add new features by using Angular.js.

Technologies used: React.js, Angular.js, and React Native

Company: **PARTNERS HOME CO., LTD**

Mar 2022 – Dec 2024

Company Location: Japan

Position: **Senior Software Engineer (Remote)**

Team size: **10 to 20** people

Responsibilities:

- Played as a Frontend Team Leader.
- Build the project structures from the sketch.
- Conduct the code reviews.
- Act as the bridge between developers and the QA teams.
- Share the knowledge to the juniors.
- Developed full-stack web applications by using JavaScript frameworks.
- Maintained existing web applications and add new features by using Vue.js.
- Deployed the applications by using CI/CD, Docker, Nginx, and AWS.

Technologies used: AWS, React.js, Next.js, Vue.js, Express.js, Storybook, Tailwind CSS, Scss/sass, Shadcn UI and Redux

PROJECTS

You can see more projects at [my portfolio website](#).

Applicant Tracking System

- It's a web app to track the applications (resumes) of the applicants by using Next.js and API endpoints from AI backend.
- It includes two systems. One is for the consumers to submit their resumes and another one is the administration dashboard to manage the candidates and send the emails.

ADDAS LINE Enhance

- Implemented using React.js by integrating with LINE's messaging API.
- It's like a chat bot at LINE to support everything while you sightsee in Japan.

Myanma Insurance

- It is an insurance app and implemented using React Native.
- It aims to purchase insurances of Myanmar's Insurance and to read about Myanmar's Insurances and to calculate the price of Insurances.

Sai Sai Pay and Uab Pay

- They are e-wallet apps and implemented using React Native.
- It aims to save as digital money and to transfer easily between people and to checkout everything as digital currency.

TECHNICAL SKILLS

Proficient in

Programming Languages

- HTML5
- CSS3
- JavaScript
- TypeScript

Frameworks and Libraires

- Tailwind CSS
- Shadcn UI
- Scss / Sass
- React.js
- Next.js
- Redux
- Redux Toolkit
- NextAuth
- React Router
- React Native
- Express.js

Tools

- Git, GitHub and GitLab
- Jira
- Confluence
- Teamspirit

Databases

- PostgreSQL
- MySQL

OS

- Windows, Linux, IOS, MacOS and Android

Familiar with

Programming Languages

- Java
- Python

Frameworks and Libraires

- Vue.js
- Angular.js
- Nest.js
- Material UI
- Chakra UI
- Ant Design
- Clerk
- Stripe
- Storybook
- Zod
- React-hook-form
- Tanstack
- Supabase
- Prisma
- Android (Java)

Tools

- Figma
- Adobe XD

Databases

- GraphQL
- MongoDB

ABILITIES

- Self-motivation, self-study, and collaboration.
- Knowledge on both Functional Programming and Object-Oriented Programming.
- Familiarity with build tools such as Webpack, Babel, Vite, and Turbopack.
- Familiarity with various JavaScript runtime environments such as Node.js, Bun, etc.
- Experience on localization technologies such as **i18n**.
- Experience and knowledge on Databases, REST API and Web development.
- Experience and knowledge on DevOps field (Bash Scripting, Configuration Management (Ansible), CI/CD, Container Technology (Docker), Kubernetes, Infrastructure Automation with Terraform) for various environments (DEV, STG, UAT, PROD, etc).
- Experience and knowledge on Cloud Computing Services (AWS, Azure, GCP, DigitalOcean, Vercel, etc. But mostly AWS).
- A little experience and knowledge on Machine Learning (saving, restoring and exporting models) using Python and TensorFlow framework.
